

ERP System Developer

Hub Promotional Group (HPG), a limited liability company with 7 promotional products manufacturing suppliers across North America is seeking a full time ERP System Developer. Candidates with **NetSuite or any ERP system** experience highly desired and encouraged to apply.

Position Summary: The ERP System Developer (ESD) will be a part of a team currently supporting **NetSuite** for 4 subsidiaries within HPG. This role will be responsible for the development of coding based on the design of a solution that meets enhancement requests that are requested by various departments that are using the system. He\she will need to be able to develop and configure NetSuite based on the architecture\design of the solution using any or a combination of custom coding/programming and configuration capabilities within NetSuite's such as custom records\fields, custom lists and or workflows. The ESD will need to understand department's business needs and translate them to system requirements, write technical specification documents, ensure test cases are mapped to requirements document and verify all system functionality is tested. The ESD will work with the requesting department's business process owner to determine a design that will meet their needs and as a result will need to explain in general terms of inherent issues or challenges or pros and cons of one design solution vs another.

This role may also be a project team member for the onboarding or migration of a newly acquired promotional products manufacturing entity or an existing subsidiary that will be migrated into HPG's NetSuite system. During a project of this nature, travel maybe necessary at times up to 35%. This role will work with users, department managers, members of IT and consultants and will report to HPG's Enterprise Software Manager. This is an onsite position and can be located in either Salt Lake City, UT or Braintree, MA.
